

VEGAN D-GLUCOSAMINE HCL

500mg

N033

VEGAN

VEGETARIAN

Glucosamine, which is naturally synthesised by the body but rarely found in natural food sources, provides raw material for the building blocks of cartilage tissue around joints.

- The production of glucosamine may decrease as we age.
- There are no edible sources of glucosamine – bound forms do occur in cartilage but in meat this is gristle, and we tend not to eat it.
- Glucosamine hydrochloride (the chloride form of N-acetyl glucosamine) is the newest and purest form of glucosamine.
- Our Vegan Glucosamine is derived from fermented corn (500mg).
- Glucosamine is best taken with a protein-containing meal.

Product Information:

60 capsules = 30-60 days supply

Suitable for:

Men and women

Form:

Capsule

Vegan D-Glucosamine HCL

1 capsule provides on average:

Active Nutrient	Strength	%NRV+
D-Glucosamine Hydrochloride	500mg	*
